IFMA Foundation Announces Major Research Survey

As part of its research program, the IFMA Foundation is conducting an international survey to get feedback related to topics it is considering for white papers during the current year. Sample topics being considered include:

- Alternative Energy Sources
- Determining Asset Value by Condition Assessment
- Economics of Maintenance
- Facility Reconfiguration
- BIM in Facility Management
- FM Technology Update
- Green Cleaning: Best Practices
- FM Glossary
- Offshore Facility Management and the Impact of Non-Compliance
- Peak Oil
- Workplace Management

There are many objectives of the survey, including: prioritizing the topics being considered; identifying additional topics for consideration; identifying potential subject matter experts and sponsors; and the solicitation of input from both national and international facility management organizations. To get additional information on the topics and to participate in the survey, please visit:
