CONSTRUCTION TECHNOLOGY SUMMIT 2016

GOVERNMENT & INDUSTRY

DAY 1: DIGITAL INNOVATORS FORUM
INVESTMENT CENTRE VICTORIA
LEVEL 46, 55 COLLINS STREET, MELBOURNE

DAY 2: INDUSTRY SUMMIT & EXPO
STATE LIBRARY VICTORIA
328 SWANSON STREET, MELBOURNE

CO-HOSTED BY
Construction Technology Summit 2016 connects Australia’s leading contractors, developers and consultants with leading Australian digital construction technology innovators to explore how the construction, infrastructure and asset management sectors will be transformed by the next wave of digital innovation.

In 2014, the construction sector contributed $21.6 billion to Victoria’s economy, earning the distinction of being the 5th largest employer in the State and a place on Victoria’s list of top “future industries.” An in-depth review of industry practices and dynamics reveals the vital role that new construction technologies will play in improving industry productivity and performance as well as facilitating future growth.

Today, the pace of technology is transforming construction project delivery, with new solutions driving improved process efficiency, resource optimization and better risk management. This unique event will spotlight what’s working and what’s next in project delivery technology and will advance the concept of “construction collaboration.” The goal is to lay the foundation for building a mobilized and engaged ecosystem of solution providers that can have a transformative impact on the construction sector, Victoria and all of Australia.

This event will provide participants with: opportunities to interact with key industry influencers; insight into how to achieve success in local and global markets; and the chance to expand business networks and promote new products and technologies.
Construction Technology Summit 2016 will provide start up participants with:

- Opportunities to interact with key industry influencers;
- Insight into how to achieve success in local and global markets;
- And the chance to expand business networks and promote new products and technologies.

The aim of this event is to promote discussions on what’s working and what’s next in project delivery technology and to advance the concept of "construction collaboration", paving the way for integrated solutions that will enable construction and engineering firms to reap the benefits of advanced ecosystems.

Who will attend?

- Australia’s leading contractors, developers and consultants
- Representatives from the next wave of digital construction technology
- Government representatives

Construction Technology Summit 2016 will feature:

- Keynote address from the Victorian Government
- Project delivery methodology review
- Business-and technology-oriented sessions
- Industry expert and customer roundtables
- Partner product, strategy and solution showcase

Topics covered will include:

- Leveraging partnerships and emerging technologies to develop new market solutions
- Managing construction project information in a dynamic cross-company environment
- Harnessing big data to inform decision-making, manage risk and solve problems
- Using BIM to increase efficiency, reduce operating costs and improve safety
- Commercializing construction technology
- Bridging the gap between industry and research
- Increasing utilization of cloud services
- Extending mobile access
- Improving industry productivity through better systems
- Building new platforms and API’s based on open standards and open data
- Protecting against security threats
- Exploring the potential impact of emerging technologies such as 3D processes, new materials and robotics

CONSTRUCTION TECHNOLOGY SUMMIT 2016

Day 1: Thursday June 16th
Digital Innovators Forum

Day 1 is the ultimate forum for entrepreneurs seeking insight into how to form partnerships, secure funding and open new channels to market. Hear from speakers that have grown construction technology businesses themselves, or that supported businesses on that journey.

JUNE 16 – Startup Day

Keynote: Victorian Government
Roundtable Discussions: Building world class development teams, Working with government & Closing complex sales
Case Studies: Connecting the ecosystem
Roundtable Discussion: How to successfully tackle overseas markets
Investor Perspective: Financing vertically focused software startups
Building a world class business
Networking drinks

EVENT PRICING

TECH STARTUPS AND SMEs

PREMIUM PASS
Day 1: Startup day
Day 2: Industry Summit and Expo
• Full access for two delegates on both days
• 10 minute showcase pitch (guaranteed)
• Exhibition space (trestle table)
• Half page profile in conference ecosystem overview booklet (take-away for all industry participants on day 2).
• Complimentary ecosystem networking drinks and dinner on evening of 16th.
$1,000

STANDARD PASS
Day 1: Startup Day
Day 2: Industry Summit and Expo
• Full access for delegates on both days
• Half page profile in conference booklet
• Access to ecosystem networking drinks on the 16th
$245 per delegate

INDUSTRY PARTICIPANTS

JUNE 17 – Industry Summit & Expo

Introduction: Digital transformation of construction and infrastructure

Keynote: Importance of construction technology sector to Victoria’s future
Panel Discussion: Emerging trends in Construction and Infrastructure
Panel Discussion: Emerging trends in Facility and Asset Management
Panel Discussion: How to successfully deploy construction software products
Innovation Spotlight: Startup pitches
Networking Drinks

Day 2: Friday June 17th
Industry Summit and Expo

Day 2 of the Summit brings the start-ups and SMEs together with leaders in the Australian construction industry, both to present their vision and capabilities construction innovators, industry, government and media to facilitate innovation, networking and business opportunities.
